ENG10LTIN00010

acid	alkali	amplitude	anaemia	anaerobic
analogue	antibody	antigen	aquatic	artery
atom	bacteria	base	biome	biosphere
biotic	capillary	carnivore	cell	cellular respiration
cilia	circuit	combustion	conductor	consumer
convection current	cortex	crest	deciduous	decompose
density	desert	diffusion	dynamic	ecosystem
electron	element	endemic	endocrine	endothermic
energy	enzyme	ephemeral	epicentre	epidermis
eukaryote	exothermic	extinct	feral	food chain
food web	force field	fossil	frequency	ganglion
geology	granulocyte	gravity	habitat	haemoglobin
herbivore	hertz	homeostasis	hormone	hydrocarbon
hyperventilation	inflammation	invertebrate	isotope	lignotuber
lymphocyte	macrophage	magma	mitochondria	nerve
neuron	neurotransmitter	nuclear fission	oxidation	pathogen
peripheral	photosynthesis	pituitary gland	polymer	producer
qualitative	quantitative	quarantine	radiation	radioactive
rainforest	reactant	receptor	scavenger	seismology
sensor	stem cell	subduction	supernova	synapse
